Question Number :1	**Year : 2020**	**Previous Year PT**

One way to vertically center is to use my-auto. This will center the element within it's flexbox container (The Bootstrap 4 .row is display:flex). For example, h-100 makes the row full height, and my-auto will vertically center the col-sm-12 column.

Question Number :2	**Year : 2020**	**Previous Year PT**

One way to vertically center is to use my-auto. This will center the element within it's flexbox container (The Bootstrap 4 .row is display:flex). For example, h-100 makes the row full height, and my-auto will vertically center the col-sm-12 column.
